

Symptoms of Coronavirus (COVID-19)

Your symptoms can include the following:

Fever

If you have COVID-19, you may have mild (or no symptoms) to severe illness.

Symptoms can appear 2-14 days after you are exposed to the virus that causes COVID-19.

Cough

Seek medical attention immediately if you or someone you love has **emergency warning signs**, including:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion or not able to be woken
- Bluish lips or face

Shortness of breath

This list is not all inclusive. Please consult your medical provider for any other symptoms that are severe or concerning.

COVID-19 FOR SENIORS

SYMPTOMS IN SENIORS

- Falls
- Confusion
- Fever
- Cough
- Fatigue
- Shortness of Breath
- Body Aches

What To Do If You Show Symptoms

Coronavirus can be dangerous for seniors. The elderly, especially those who have chronic conditions like asthma, diabetes or heart disease, may be at a higher risk of serious complications from COVID-19. Seniors may show different symptoms and experience non-traditional symptoms of COVID-19. Please check-in frequently on your loved ones. If you or anyone you know may be showing symptoms, promptly call your healthcare provider.
